

Special Inks

In Cromos laboratories, special shades for products, companies, brands, or situations that require a standardization of printed colors can be developed.

The colors are developed and applied under controlled environmental conditions and with latest generation equipments to properly simulate the offset (flat and rotary) printing, flexography and rotogravure.

CATALOG OF OFFSET SPECIAL INKS

Cromos has developed its own catalog of special colors, with inks for prompt delivery, which has become an important and traditional support material, widely used as reference in the printing market. Request Cromos' Commercial Department or an authorized representative for an exemplary.

CROMOS EXPRESS

Cromos' clients also count on the efficiency of Cromos Express, quick service units specialized on development and manufacture of printing inks with special colors that use equipments and operational concepts totally directed to better meet urgent orders. Cromos works in the pace you need.

IMPORTANT RECOMMENDATIONS FOR THE DEVELOPMENT AND ELABORATION PROCESS OF SPECIAL INKS:

- Provide us with the printed standard or some ink sample.
- Provide us with the support to be used for the printing.
- Inform us about the type of graphic finish to which the printing will be submitted.
- Inform us about the special characteristics of resistance, such as light, chemical products, temperature, among others.

The information in this catalog is based on the recommendations from our suppliers and experiments in our laboratories. It should not be understood as a guarantee. We recommend confirming it for each case. If in doubt, contact our Technical Assistance Department.
